Evidence Descriptions

The following codes shall be used to document toxicology evidence when documenting by hand. Digital Documentation using MIDEO only requires documenting the packaging on the request form and a photograph(s) of the enclosed evidence.

Packaging:

sbakit = sealed blood alcohol kit

bakit = unsealed blood alcohol kit

se = sealed envelope

e = unsealed envelope

sbox = sealed box

box = unsealed box

sbottle = sealed bottle

bottle = unsealed bottle

spib = sealed plastic bag

plb = unsealed plastic bag

scup = sealed cup

cup = unsealed cup

sbbp = sealed brown paper bag

bbp = unsealed brown paper bag

Tube size (mL): 2, 3, 4, 5, 7, 10, 15, etc.

Stopper color:

G = gray

R = red

P = purple

V = green

Y = yellow

Any color not listed above will be documented in the case file

Identifiers:

N = name of subject

D = date of sample collection

T = time of sample collection

I = name or initials of individual collecting the sample

A = agency case number

B = date of birth

L = driver's license number

*O = other (information will be documented in the case file)

**UL = unlabeled tube

*When information written on a piece of evidence does not correspond with laboratory codes or is not listed on the request form, it will be considered "other" (e.g., social security #).

**If there is not information written on the submitted evidence, it will be considered unlabeled (UL). The name of the subject/victim will be written on a label and affixed to the piece of evidence.
